SPEND MORE TIME CARING FOR PATIENTS— AND LESS TIME ON PA

Electronic prior authorization (ePA).

Process prior authorization (PA) requests for your patients in real-time at the point of care with MedImpact's enhanced ePA platform.

MedImpact's ePA program automates the PA process and allows prescribers to initiate PAs prospectively in the patient's electronic medical or health record (EMR/EHR) or directly through vendor connectivity portals.

Our ePA program interfaces with connectivity vendors Surescripts, CoverMyMeds, and CenterX, which all provide behind-the-scenes electronic exchange of member eligibility, benefit coverage, and prescription information between prescribers and MedImpact.

Complete PA requests in real-time and receive the clinical detail required to immediately process requests.

How to submit an ePA:

Conveniently submit requests at the point of care through the patient's electronic health record. If the EMR/EHR does not support ePA, you can use one of these vendor portals:

- **CoverMyMeds ePA portal:** https://account.covermymeds.com/signup
- **Surescripts ePA portal:** https://providerportal.surescripts.net/providerportal/
- **CenterX:** https://www.centerx.com/technologies/electronic-prior-authorization

For Vendor questions and support, please call:

- **CoverMyMeds ePA portal:** (866) 452-5017
- **Surescripts ePA portal:** (866) 797-3239
- **CenterX:** (855) 236-8379
