## MedImpact: A Unique PBM

MedImpact, an independent, trend-focused pharmacy benefit manager (PBM), is the nation's largest privately held PBM, serving health plans, self-funded employers and government entities.

Our business model is unique: avoiding conflicts by not owning fulfillment. Instead, we focus on effectively managing client pharmacy benefits for Lower Cost and Better Care through One Source.

Our number one goal is client satisfaction by providing flexible solutions and patient-centric products, with a focus on low net-cost and quality outcomes.

Founded in 1989, MedImpact provides pharmacy services for more than 50 million lives in the U.S. and abroad while processing in excess of 430 million claims annually.

MedImpact is headquartered in San Diego, California, nicknamed "America's Finest City." Besides having one of the world's most favorable climates (about 70° year-round), San Diego has broad commercial, cultural and recreational appeal, offering a wealth of diverse activities.

MedImpact's Managed Care Pharmacy Residency Program develops future managed care leaders by helping residents build a strong foundation of knowledge in both clinical and managed care principles.

## Learning Experiences

### Clinical Operations and Analytics

Learn benefit design and utilization management strategies, understand claims adjudication, and perform cost savings and member impact analyses.

### Clinical Program Development and Operations

Learn about various clinical programs. Contribute to clinical quality programs to improve HEDIS and CMS Star Ratings.

### P&T and Clinical Drug Information

Develop and present monographs and formulary management recommendations to MedImpact's national P&T Committee. Monitor and evaluate the Clinical Pipeline.

### Specialty Clinical Management

Use advanced analytics to identify and improve specialty drug utilization to promote clinical quality and mitigate waste. Provide clinical oversight of specialty pharmacies.

### Clinical Account Services

Directly support clients by developing and implementing quality and cost saving initiatives and managing custom formularies across all lines of business.

### Formulary Administration and Strategy

Understand analytical, technical, and operational aspects of formulary management. Learn about all lines of business including Part D, Commercial, Medicaid, and Health Insurance Marketplace (HiEX).

### Pharmacy Network Management

Understand the strategies involved with contracting, implementing, and managing pharmacy networks.

### Clinical Prior Authorization

Evaluate prior authorization requests for appropriate use and understand the regulatory requirements governing prior authorization review.

### Utilization Management Quality Assurance

Perform quality oversight of utilization management staff and develop quality improvement initiatives. Support regulatory and client oversight audits.

### Medication Use Management

Perform case management for high-risk members of a Prescription Drug Plan (PDP) to ensure quality care.

### Leadership and Professional Development

Learn how to lead a team, hire and onboard staff, and overcome obstacles faced by new managers. Develop presentation skills and lead meetings.

### Direct Patient Care

Advance your clinical pharmacy skills through the provision of direct patient care.
